16 responses

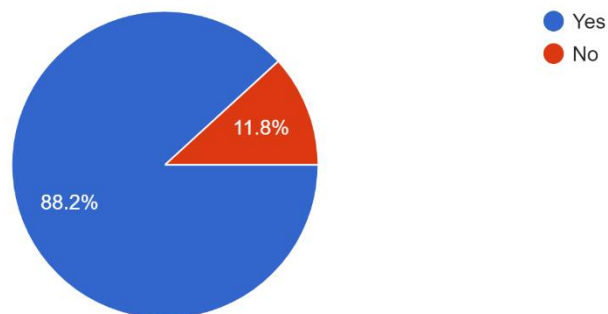

16. Students don't appreciate the efforts of the teacher during online teaching

17 responses

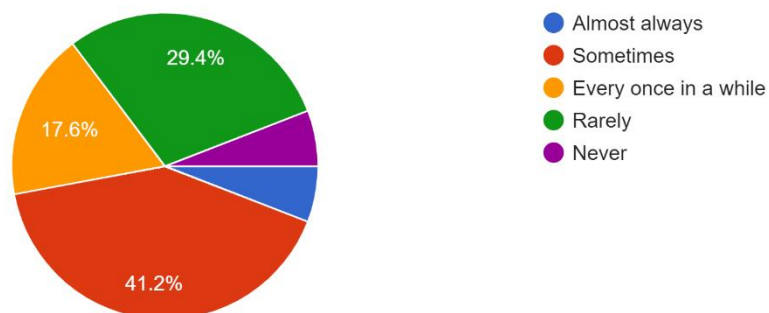

17. Do you assign topics for assignment online?

17 responses

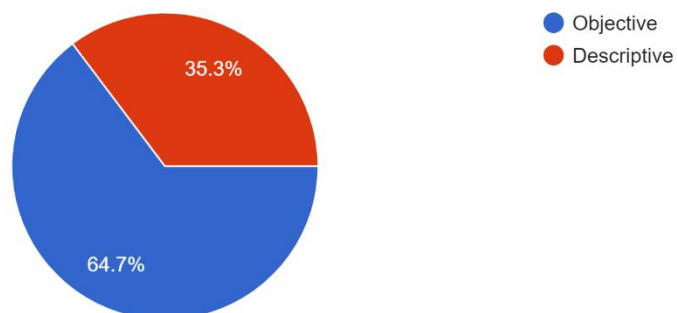

18. Are assignments completed within the stipulated time?

17 responses

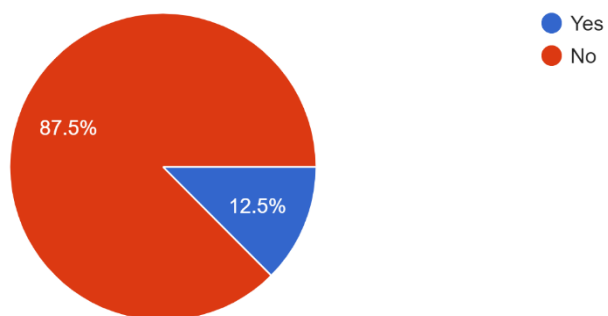

19. What method of tests do you adopt online?

17 responses

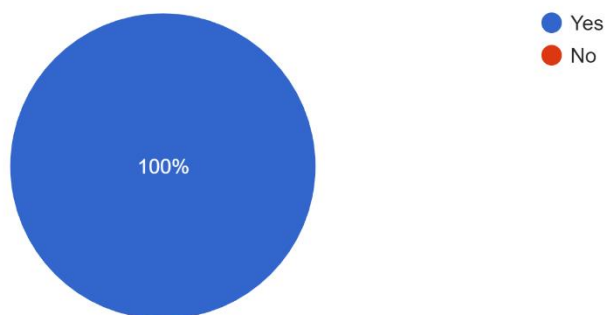

20. Is online correction comparatively easier?

16 responses

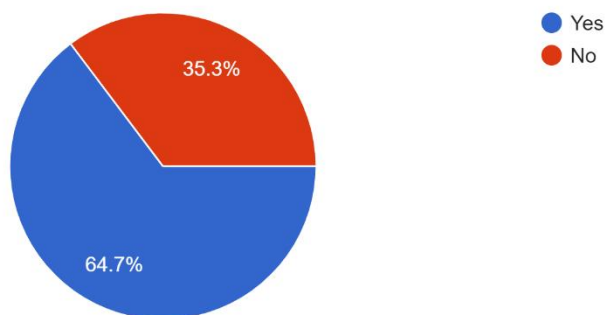

21. Do you provide students with study materials online?

17 responses

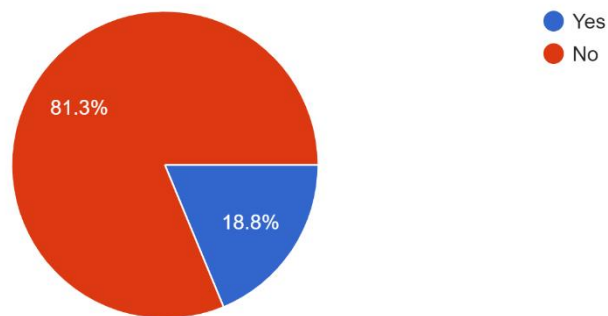

22. Is online teaching stressful?

17 responses

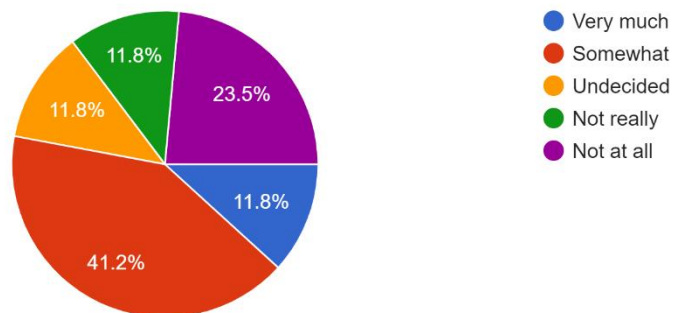

23. Do you find students enthusiastic about online learning?

16 responses

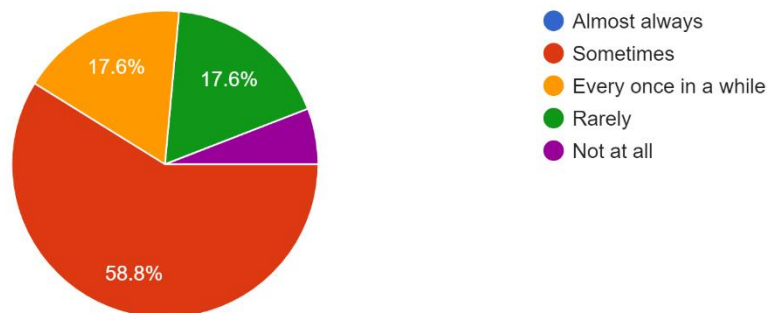

24. Do you enjoy online teaching?

17 responses

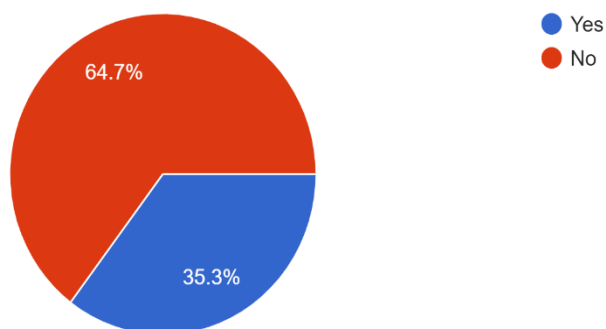

25. Do the students keep up schedule and deadline?

17 responses

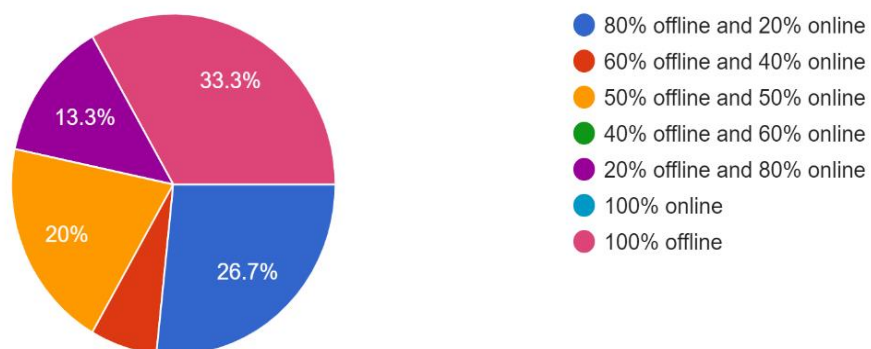

26. Would you prefer a combination of online and offline classes for your teaching in future?

17 responses

27. If yes, what percentage would you think is ideal?

15 responses

28. What is working well with the current online learning model that you would like to see continued?

Regular timing
Online short tests with objective type questions
No the online class , class room method
Google meet
Google meet
Power point presentation
Online resouces can be shared easily in students group and they can be given assignments based on online resources.
Being able to provide ample reference material.
Unnecessary time spending,littering by the students gets curtailed
Blended mode of teaching and learning as adopted...
Mobile

29. What is challenging about the current online learning model that you would like to see improved?

Nothing
Lack of technological support for rural, economically backward students
No
Nothing
Net work problem, students attention is less
Poor and rural students couldn't attend as they dont have the required mobile phone and network. And many students even started going fr part time jobs.
Students lack of involvement. Difficult to monitor their reactions since students prefer to switch off video mode to save data charges.
Exam Evolution process
Improve for evaluation model
Testing the understanding of the students missing. Not able to make sure that student is attending the class.
Staying up to date with modern tech.
Network

except for few students, most of them find it difficult to learn and sustain their motivation

The challenge of instilling interest in the student towards online learning.

30. How different has your experience been during online and offline teaching?

Regular class room atmosphere missing

The teacher can't monitor the students activities

I miss personal interaction with my students

Yes

Data charges are extreme in online and only one GB is enabled per day. Within one GB data limit, I have to work for all classes

No difference

There is no direct interaction with students and difficult to find who are actually listening class.

Online - couldn't see the students activities.

Interactive mode of teaching was difficult to implement.

Interest and attention of students we can see in offline but not in online

Huge difference

Was a real challenge.

Enthusiastic and challenging as preparation and continuous lecturing had to be given

Literally offline is more comfort than online.

Offline class is always better than online

Online teaching is more like a one way communication. Offline teaching also allows teacher to use oneself(eye contact, body language, movement ,hand gestures etc) as a tool for getting the attention of the student which is missing in online teaching.

31. How can your institution support you towards making online teaching more effective?

It's very supportive and encouraging

I Am not like that online. So Nothing

By making available the necessary technical support for students

Yes

encouraged me to perform well by attending online teaching refresher course.

We must be provided with a laptop with net connectivity

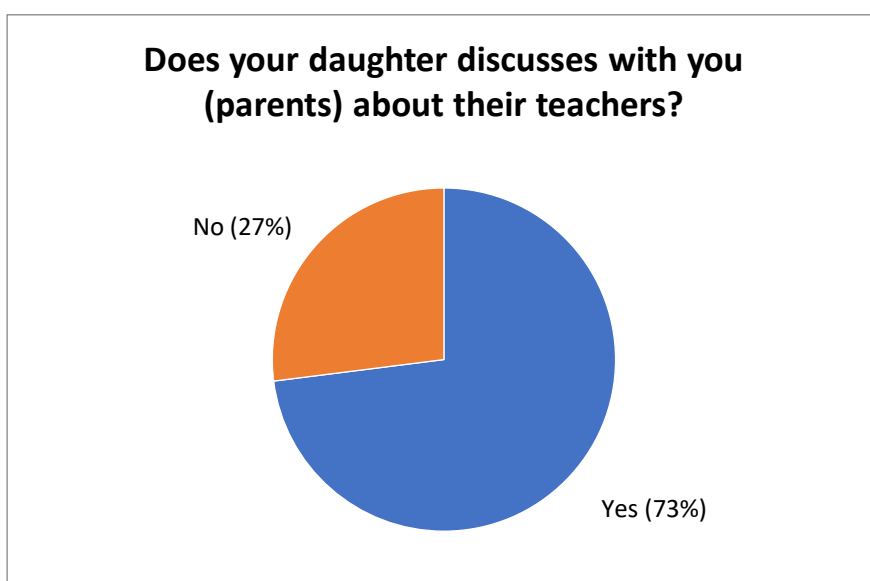

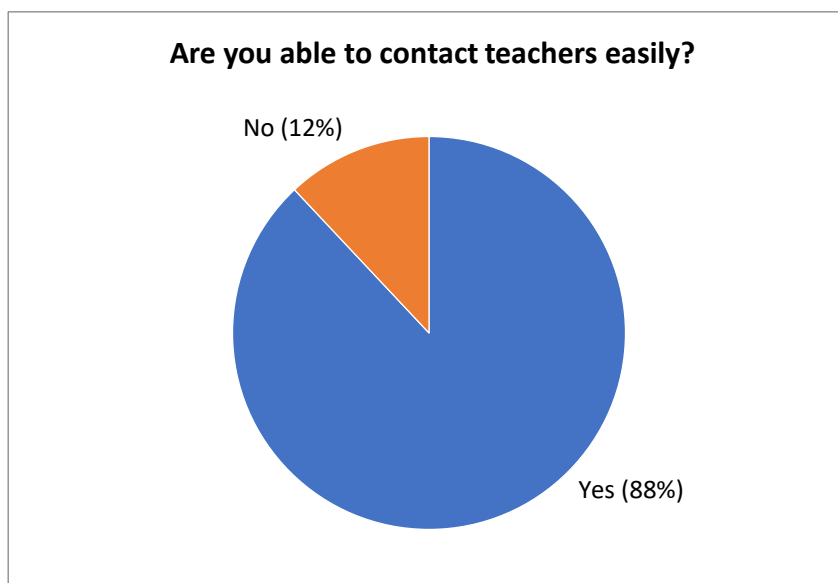

Institution always supports making online teaching

The institute is already giving its fullest support.
Institution can give training to students in using accessing online resources to both students and faculty members. Also institution can frame rules and regulations in online teaching.
Every positively
Good support
Providing them with free mobile data.
Still, we are encouraged by our institution towards online teaching with effectively...
No answer
Train the students in using technology .

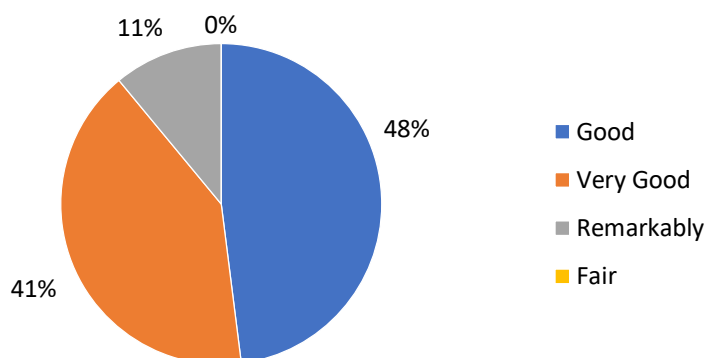

Parents's Feedback Analysis Report(2016-2021)

The Feedback from parents was developed both in English and in Tamil. The collected data was analysed for quality enhancement and development of the college.

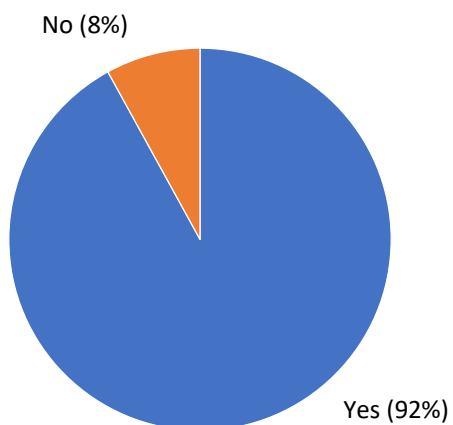

The parents opined that their daughters' education will improve the standard/quality of 'their life. Almost all the parents (100%) agreed that the college environment is suitable for their daughters and were satisfied that the course will be of use for their daughters' development.

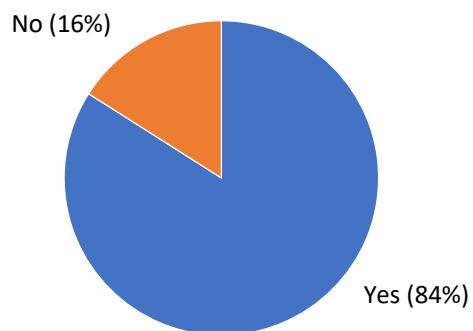

The relationship between the teacher and the students

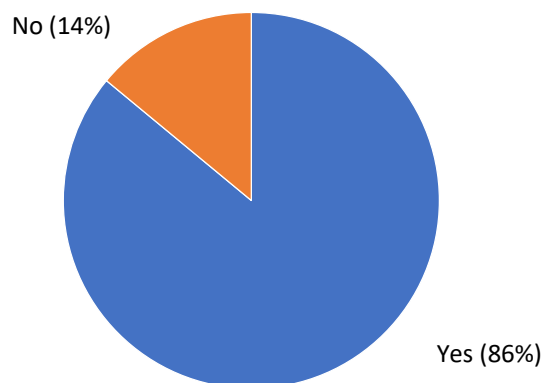

Student shares college experiences at home

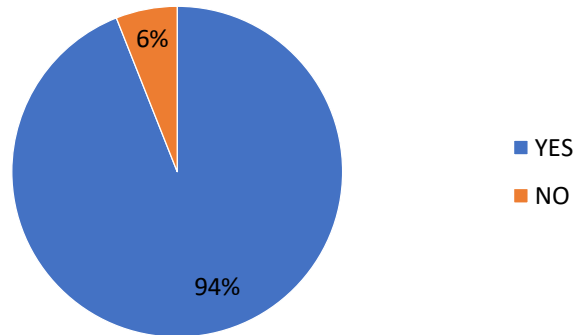

**Parental satisfaction with the initiatives /
measures taken for the development of
the students**

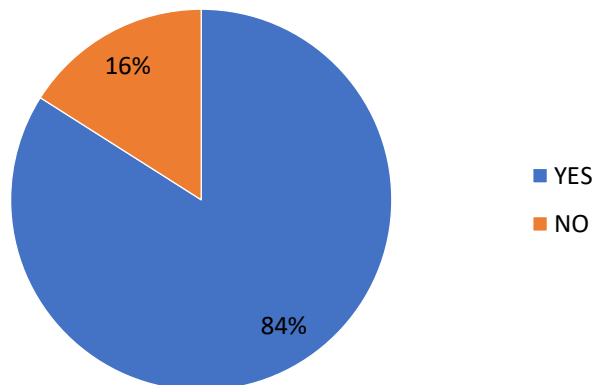

**Student communicates/discusses the
results of the semester examinations with
parents**

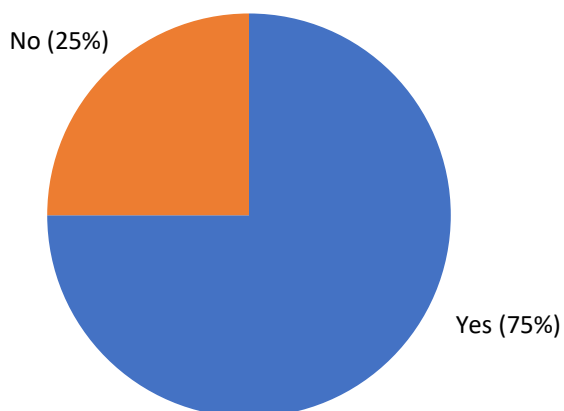

Student takes leave only with parental permission

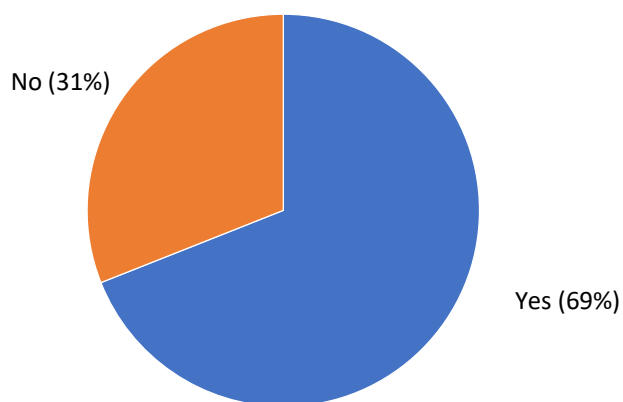

The training given to your daughter will be helpful for their future life

The economic condition helps to provide the necessities of a good education for your daughter

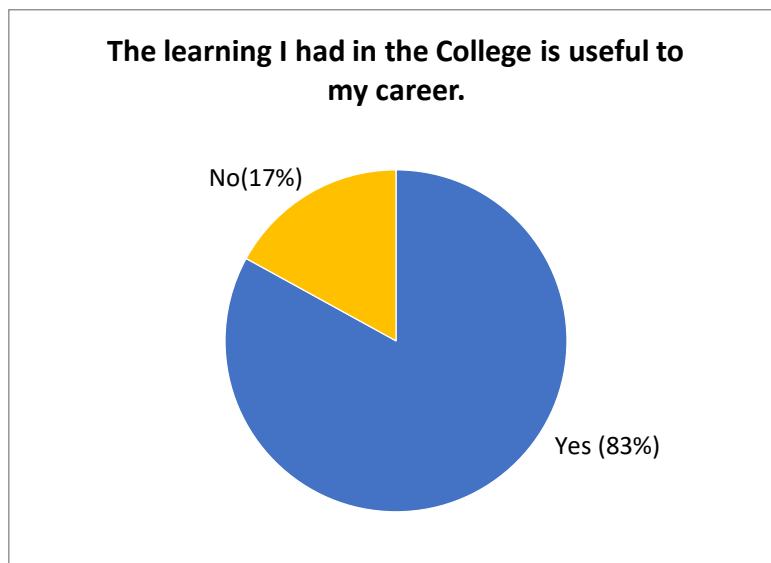

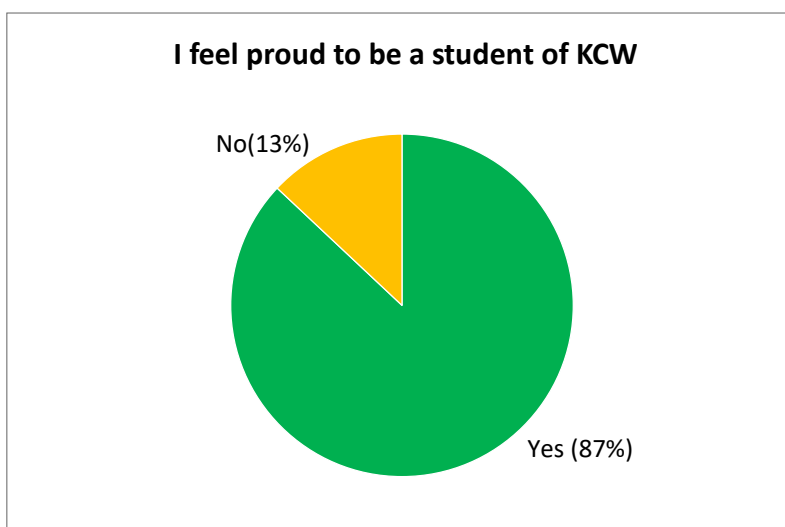

Parents like their daughters to pursue higher education after this present course

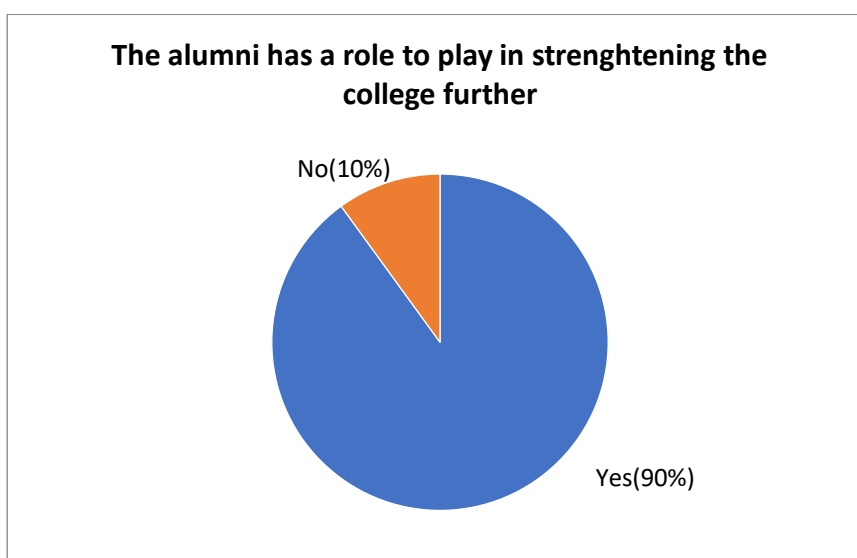

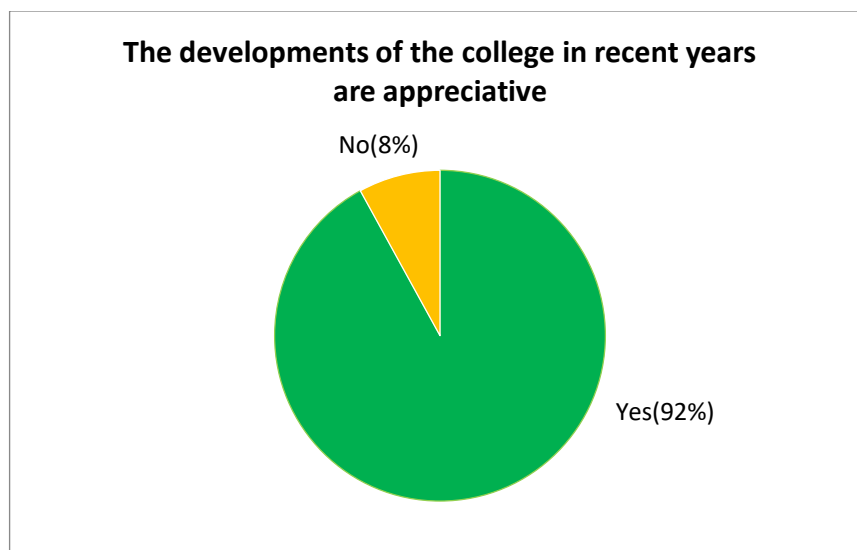

The following are the observations and suggestions given by the parents for the development of the college

- Separate building for the College (55%)
- New courses (B.A. English, B.Com) to be introduced (10%)
